

Education

City University of Hong Kong

BSc Data Science & BBA Finance (Minor: Business Economics)

Hong Kong

Anticipated Jun 2027

- CGPA: 3.52 | Dean's List (2023) | CityUHK International Student Scholarship and Diversity Grant
- Relevant Coursework (Selected): Convex Optimisation, Advanced Statistics, Linear Algebra, Derivatives & Risk Mgmt, Security Analysis & Portfolio Mgmt, Machine Learning, Financial Data Analytics

Work Experience

Natixis Corporate & Investment Banking

Intern, Finance & Market Risk

Hong Kong

Jan 2026 - Present

- Drive the digital transformation of month-end reporting and reconciliation frameworks, enhancing the efficiency and accuracy of regulatory financial submissions.
- Develop and deploy automated Alteryx workflows to ingest, parse, and validate complex financial ledgers, replacing manual Excel-based processes and reducing operational risk.
- Collaborate with controllers to identify process bottlenecks and implement data-driven solutions that streamline multi-entity financial data consolidation for faster reporting cycles and clearer audit trails.
- Analyse daily traded risk exposures and Value-at-Risk (VaR) metrics for diverse asset classes, ensuring all trading activities remain within established risk limits and regulatory boundaries.
- Streamline daily traded risk reporting by automating data extraction and validation processes, improving the accuracy and delivery speed of risk exposure metrics for senior management.

Turoid AI

Financial AI Engineering Intern

Hong Kong

Sep 2025 - Dec 2025

- Built a full-stack wealth management platform for family offices and HNW clients, consolidating multi-custody portfolios from 40+ banks into a single dashboard and powering an automated landing page that refreshes daily with market news, holdings, upcoming events, and AI-driven portfolio recommendations.
- Designed and implemented valuation, scenario-analysis, and stress-testing tools for equity-linked structured products (e.g. ELNs, FCNs), combining a Python analytics backend with web frontends and improving portfolio risk calculations by 15%.
- Automated ingestion and parsing of multi-custody bank statements and trade advices into a unified data model, cutting manual reconciliation time by 70% and enabling scalable portfolio analytics, risk monitoring, and reporting.

CityUHK – Office of Vice President (Research)

Data & Analytics Intern (Part-time)

Hong Kong

Aug 2024 - Dec 2025

- Automated data collection and cleaning using Python web crawlers, ensuring data integrity and cutting manual benchmarking effort by 40% to drive process improvements.
- Conducted advanced statistical analyses and built 5+ Tableau dashboards to deliver data-driven insights, supporting decision making and financial oversight for university resource allocation.

Langya AI

Quantitative Portfolio Assistant Intern

Hong Kong

Jun - Sep 2025

- Developed a multi-factor stock price forecasting model leveraging historical stock data, macroeconomic indicators, and company fundamental performance, utilising an ensemble of machine learning models to predict 10-day future stock prices with an aim for increased accuracy over single models.
- Built a comprehensive stock database in collaboration with senior analysts, improving data integrity and model training accessibility by 25%.
- Supported daily portfolio oversight through quantitative and qualitative analyses by monitoring performance metrics, conducting risk analysis, and leveraging deep learning insights to inform forecasting, ensuring alignment with business goals.

Projects

- Quantitative Portfolio Management System:** Built an end-to-end Python system for portfolio optimisation, leveraging quantitative models (Markowitz, Black-Litterman) to recommend risk-adjusted asset allocations. The project integrates robust risk analysis, historical back testing, and dynamic data visualisation, showcasing a full-stack approach to financial analytics.
- Financial Market Sentiment Analysis System:** Developed a Python-based machine learning pipeline to forecast daily stock returns by integrating a deep learning sentiment analysis model with technical indicators. The model was validated using a time-series cross-validation approach.

Leadership & Achievements

- Internal Vice President – Pakistani Student Association CityU (2025 – 2026):** Launched 3 support initiatives and spearheaded 5+ events for 200+ students, driving a 50% increase in engagement and a 70% boost in regional applications.
- The FAN Awards – Outstanding Community Service Awards for Non-Local Students 2024:** Recognised for leading and participating in 15+ volunteer projects impacting 500+ Hong Kong residents.
- Cedar Leadership Award 2023:** Recognised for founding a peer tutoring program and spearheading the college's national

science Olympiad.

Technical Skills

- **Programming Languages:** Python (Pandas, NumPy, BeautifulSoup, Scrapy, Selenium, Scikit-Learn), C++, SQL
- **Financial & Data Tools:** Alteryx, Tableau, Microsoft Excel, PowerPoint, Financial Modelling, Statistical Analysis, Hugging Face, OpenAI API

Additional Information

- **Certifications:** Web Scraping in Python (LinkedIn Learning, 2024), REST APIs (LinkedIn Learning, 2024), **Bloomberg Finance Fundamentals** (Bloomberg, 2026), Introduction to Risk Management (LinkedIn Learning, 2026)
- **Languages:** Native English & Urdu
- **Hobbies:** Hiking, Photography, Board games, Cooking, Reading
