Alpha Access Limited Hiring Team
Hong Kong SAR

Re: Credit Analyst for Hedge fund (Hong Kong)

Dear Hiring Manager,

I am writing to apply for the **Credit Analyst for Hedge fund** opening at Alpha Access Limited in Hong Kong (LinkedIn posting 4408622826). The responsibilities emphasize in-depth Asian corporate credit work, fundamental industry and company analysis, independent tracking of financials and macro trends, and tight support to portfolio managers on long and short ideas plus ongoing surveillance of portfolio names.

At Huatai Financial Holding I rotated through Liquidity Management and the Cash Bonds desk during my FICC internship, gathering Global IG research inputs, coordinating with Risk and Settlement on limits and settlement readiness, and automating FTP monitoring in Excel-VBA. At China Life Insurance (Overseas) in Investment, I supported about \$5 billion across 13 funds spanning ABS, energy, infrastructure, and real estate, joined PM and trader sessions on credit trends and allocation, and produced Bloomberg and Morningstar-driven bond recommendations with documented rationales for reviewers.

I know the posting targets professionals with several years of buy-side or sell-side research experience; I am earlier in that track and offer disciplined execution, graduate training in finance at HKUST, and bilingual Mandarin and English research habits. My current role at OSL in Trading & Liquidity keeps me in high-stakes, delivery-focused workflows with cross-jurisdiction settlement rigor, treasury surveillance, and clean hand-offs to risk and finance partners. Earlier at Amber Group on market-making operations I paired pivot-led discipline with Tableau dashboards that tied incentives to measurable desk outcomes. I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours), minor Finance, from CUHK, with Bloomberg, Wind, Tableau, R, and Excel/VBA skills.

Thank you for considering my application; I would welcome a conversation about how my fixed income allocator and cash-bond desk experience can support thoughtful credit coverage for your client team.

Sincerely,

Zhao Yanbo
