DV Trading Hiring Team
Hong Kong

Re: Equity Research Analyst

Dear Hiring Manager,

I am writing to apply for the **Equity Research Analyst** role with DV Trading in Hong Kong. The posting emphasizes fluent Mandarin and English, rapid synthesis of news and macro developments, collaboration with traders and analysts, disciplined databases, and strong Excel with Bloomberg experience, which aligns directly with my markets-facing internships and current trading support work. My languages match your bilingual requirement, and I communicate crisply when timelines tighten.

At OSL I maintain real-time settlement and treasury surveillance alongside traders during volatile sessions and escalate liquidity gaps with concise rationales. That mirrors the posting's need for timely reads on market-moving events and clean communication under pressure.

Previously at Amber Group I paired Excel pivot workflows with Tableau dashboards tied to desk incentives and throughput, improving tracking efficiency by about 30% and cutting partner-project delays by about 25% amid fast-moving tape. During my Huatai FICC internship I rotated through Liquidity Management and Cash Bonds, gathering macro data and Global IG research for traders while automating FTP monitoring in Excel-VBA with Risk and Settlement; at China Life I screened bonds with Bloomberg and Morningstar for portfolio managers managing about \$5 billion across sleeves.

I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours) from CUHK. I welcome the chance to discuss how I can support DV Trading's research and trading workflow.

Sincerely,

Zhao Yanbo
