OSL

Trading & Liquidity Department, Trade Support Associate

- Architected scalable operational frameworks across HK, SG, AU, CA, ID, and BM with standardized settlement paths and treasury-grade controls so multicurrency liquidity stayed auditable ahead of downstream finance reporting.
- Managed ETF, RWA, and FX-linked settlement with disciplined exception logs across fiat ramps and liquidity partners, sustaining venue reliability under 0.5% failure in high-volume treasury-style cash movements.
- Executed cross-chain liquidity moves and bridge operations for JIT desk inventory, improving capital turnover by about 20% while guarding gas and slippage drag during volatile liquidity calls.
- Ran treasury-style surveillance on custodian balances and broadcasts through stressed markets, escalating booking breaks early so treasury and Front Office counterparts could rebalance exposures before cut-offs.

- Partnered across MM and BD workstreams so incentives, treasury hand-offs, and month-end reconciliation inputs synchronized before consolidated reporting checkpoints relevant to sales-linked incentive cycles.
- Produced Tableau performance views on BD incentives and event ROI tied to treasury throughput narratives, aligning leadership reviews with measurable revenue uplift near 15% in the monitored Web3 campaigns.
- Logged STP gaps and escalation themes for multinational stakeholders, translating booking noise into prioritized control fixes similar to multicurrency treasury operations timelines.
