Nomura Hiring Team
Global Markets / Instinet
Central, Hong Kong SAR

Re: Associate, Korea High Touch Sales Trading, Hong Kong

Dear Hiring Manager,

I am writing to apply for the Associate role on the Korea High Touch Sales Trading desk in Hong Kong at Nomura (LinkedIn posting 4409263906). The role's focus on institutional client coverage, disciplined trade execution, cross-desk collaboration with Sales, Research, and Operations, and careful attention to liquidity and regulatory expectations matches how I have supported trading environments in Hong Kong.

At OSL in Trading & Liquidity I run trade support and treasury monitoring across multiple jurisdictions. I standardize settlement pathways, track custodian and house balances through volatile markets, and escalate breaks with clear rationales so Front Office can act while controls stay independent, which mirrors the risk-aware, high-pressure cadence you describe for an Instinet high-touch trading seat.

Previously at Amber Group on the Market Making desk I kept booking hygiene, pivot-led BAU, and stakeholder alignment across MM and BD partners under tight weekly deadlines, with Tableau views that tied incentives to desk outcomes. During my FICC internship at Huatai Financial Holding I rotated through Liquidity Management and Cash Bonds beside Flow Trading, circulated IG research and macro inputs, and partnered with Risk and Settlement on limits and settlement readiness, giving me sell-side exposure to North Asian fixed income workflow alongside native Mandarin, proficient English, and basic Cantonese for HK and broader client conversations.

I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours) from CUHK, with Bloomberg, Wind, Tableau, Excel/VBA, and R. I learn quickly, communicate plainly across functions, and stay organized when multiple internal partners need the same trade facts at once.

Thank you for considering my application. I would welcome a discussion on how I can support Korea and HK/China coverage from your Hong Kong high-touch desk.

Sincerely,

Zhao Yanbo
