Axon Partners Hiring Team  
Hong Kong SAR

**Re: Quantitative Trading & Execution Analyst, Hong Kong**

Dear Hiring Manager,

I am writing to apply for the **Quantitative Trading & Execution Analyst** opening in Hong Kong at Axon Partners in support of a pioneering RMB 100B+ AUM quant manager (posting 4410463949). The combination of hands-on execution support, analytical rigor on liquidity and market context, and disciplined tooling for reporting and monitoring matches how I have worked on digital-asset trade support and traditional FICC desks.

At OSL in Trading & Liquidity, I operate settlement-heavy, multi-venue workflows and maintain strong failure-rate controls while running real-time treasury surveillance so the desk can trade through volatility with clear escalations. At Amber Group on market-making operations, I tightened daily BAU with Tableau-backed views on event ROI and incentives, tracked exceptions with owners, and improved tracking efficiency by about 30% with timely pivot-led updates. My Huatai FICC internship covered Liquidity Management and cash bond flow with Excel-VBA automation and close coordination with Risk and Settlement.

I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours) from CUHK, with Bloomberg, Wind, Tableau, R, and VBA from coursework and the roles above; the posting's emphasis on data-heavy, high-stakes execution fits environments where I have thrived.

Thank you for considering my application. I would welcome a conversation on how I can contribute to execution quality and analytical coverage for your team.

Sincerely,

Zhao Yanbo
