Harvest Global Investments Limited
Hong Kong SAR

Re: Investment Analyst, Equity

Dear Hiring Manager,

I am writing to apply for the **Investment Analyst, Equity** opportunity at Harvest Global Investments Limited in Hong Kong SAR. The role's focus on in-depth issuer and industry work, disciplined support for portfolio decision-making, and careful adherence to investment guidelines matches how I have trained in finance and operated on markets-facing desks.

At OSL in Trading & Liquidity, I standardize settlement and surveillance workflows across several jurisdictions, document exceptions with clear ownership, and keep treasury and booking data reliable for risk and finance partners during volatile markets. That environment rewards the same attention to detail, written precision, and regulatory awareness your team lists for client mandate compliance.

Previously at Amber Group on the market-making operations desk, I maintained disciplined daily business-as-usual with pivot-led controls and Tableau reporting that tied incentives and desk throughput to outcomes. At China Life Insurance (Overseas) in the Investment Department, I supported portfolio managers and traders on sleeves spanning ABS, energy, infrastructure, and real estate, using Bloomberg and Morningstar to turn screens into short, decision-ready notes ahead of reviews. During my FICC internship at Huatai Financial Holding (Hong Kong) Limited, I rotated on liquidity and cash bond workflows, distributed macro and credit research to the desk, and coordinated limit and settlement checks with Risk and Settlement using Excel-VBA monitoring.

I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours) with a Finance minor from CUHK, with Wind, Bloomberg, Tableau, Excel/VBA, and R skills. I am fluent in written and spoken English and native in Mandarin, and I am motivated to bring structured research habits, statistical rigor from my graduate work, and calm execution under deadlines to Harvest's equity team.

Thank you for considering my application. I would welcome a conversation on how I can contribute to coverage work, stock selection dialogue, and clean investment operations at Harvest.

Sincerely,

Zhao Yanbo
