Axon Partners Hiring Team
Hong Kong SAR

Re: Quantitative Trading & Execution Analyst

Dear Hiring Manager,

I am writing to apply for the **Quantitative Trading & Execution Analyst** role in Hong Kong with Axon Partners. The emphasis on owning the trading lifecycle, tightening execution through liquidity and operational discipline, and supporting strategy iteration with analytics and automation matches how I have worked on trade support and market-making operations desks.

At OSL in Trading & Liquidity, I run settlement-heavy flows across several jurisdictions, keep failure rates very low through disciplined routing and checks, and monitor treasury and on-chain latency so the desk can execute through volatility with clear escalations to risk and control partners. Earlier at Amber Group on market-making operations, I tightened daily BAU with Tableau reporting that tied incentives and throughput to outcomes and logged exception themes with owners, which mirrors the monitoring and continuous improvement posture your posting describes.

My FICC internship at Huatai Financial Holding included Liquidity Management and cash bond flow desks with Excel-VBA automation and close coordination with Risk and Settlement. I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours) from CUHK, with Bloomberg, Wind, Tableau, R, and VBA experience from coursework and the roles above.

Thank you for considering my application. I would welcome the opportunity to discuss how I can support execution and analytical work alongside your team and the quant manager you represent.

Sincerely,

Zhao Yanbo
