Hiring Team
Equity Capital Markets
Hong Kong SAR

Re: Associate to Vice President, Equity Capital Markets (ECM), Hong Kong SAR

Dear Hiring Manager,

I am applying for the **Associate to Vice President, Equity Capital Markets (ECM)** mandate in Hong Kong SAR listed on LinkedIn ([posting 4413888723](#)). The public listing anchors on leading ECM mandates and structural work across IPOs, secondary offerings, rights or placement-style issuance, block trades, and strategic coverage of the ECM franchise, paired with accountability as a liaison to senior executives and institutional clients managing long horizons. Fluent Mandarin paired with disciplined English aligns with typical Hong Kong ECM asks, and I bring native Mandarin with professional English habits from prior roles.

At OSL in Trading & Liquidity I standardised multi-jurisdiction settlement controls, supervised treasury balances through volatile tapes, and kept exception logs actionable before downstream desks consumed stale data; that translates to the coordinated, high stakes execution rhythm ECM teams expect. Previously at Amber Group I maintained disciplined BAU trackers and Tableau scorecards tying incentives and throughput to about 15% measured revenue uplift in the highlighted Web3 ops window while documenting escalation owners for fast follow-through.

Huatai Financial Holding rotated me through Liquidity Management and Cash Bonds desks with Bloomberg-driven research distribution, Excel-VBA limit monitoring, and Risk or Settlement checkpoints before cut-offs; China Life Insurance (Overseas) added institutional fixed income sleeve stewardship across about \$5 billion with documented bond rationales ahead of portfolio manager forums; Guotai Junan IBD work centred contract diligence, confirmations, and audit-ready documentation analogous to ECM book-building deliverables.

I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours) from CUHK, complemented by Bloomberg, Wind, Tableau, Excel/VBA, and R. I would welcome discussing how structured operations experience and multilingual coverage can augment your ECM footprint in Greater China.

Thank you for considering my application.

Sincerely,

Zhao Yanbo
