Sentient Labs Hiring Team  
Strategic Finance and Operations  
Hong Kong SAR

**Re: Strategic Finance and Operations**

Dear Hiring Manager,

I am writing to apply for the **Strategic Finance and Operations** opening at Sentient Labs in Hong Kong SAR (LinkedIn posting 4413733037). The role blends strategic finance, forecasting discipline, treasury-style operational rigor, and cross-functional execution across blockchain and AI initiatives, which matches how I have operated across regulated crypto venues and traditional markets internships.

At OSL in Trading & Liquidity, I standardized settlement and treasury-adjacent workflows across multiple jurisdictions, monitored liquidity and custodian balances through stressed markets, and translated operational KPIs into concise escalation notes for leadership. Previously at Amber Group on Market Making operations, I rebuilt daily BAU with pivot-led trackers and Tableau views that tied BD incentives to throughput and revenue outcomes while partnering across desks outside Trading.

During my FICC internship at Huatai Financial Holding I rotated through Liquidity Management and Cash Bonds flows and coordinated FTP monitoring in Excel-VBA with Risk and Settlement. At China Life Insurance (Overseas) Co., Ltd. I helped steward about \$5 billion across externally managed fixed-income mandates using Bloomberg and Morningstar screens with portfolio managers. I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours) from CUHK, with Bloomberg, Wind, Tableau, Excel/VBA, and R, plus familiarity with prompt engineering and machine learning listed under IT skills on my resume.

Thank you for considering my application. I would welcome a conversation about how I can support Sentient Labs with spreadsheet-heavy analyses, forecasting hygiene, treasury coordination, and operational improvements alongside Product and Business Development stakeholders.

Sincerely,

Zhao Yanbo
