Hiring Team
Equity Capital Markets
Hong Kong SAR

Re: Associate or Vice President, Equity Capital Markets (Hong Kong SAR)

Dear Hiring Manager,

I am writing to apply for the **Associate or Vice President, Equity Capital Markets (Hong Kong SAR)** role advertised on LinkedIn. The publicly visible overview stresses ECM origination and structuring across IPOs, follow-on offerings, placements, and block trades; senior liaison work with management and institutional clients in Greater China; and steering marketing, valuation, regulatory, and syndicate stakeholders on pricing and allocation from idea through completion. Native Mandarin alongside proficient English matches the language requirements stated in that listing, and my sell-side rotations and Trading & Liquidity work align with the delivery rhythm the team describes.

At OSL in Trading & Liquidity, I standardized multi-jurisdiction settlement pathways, monitored treasury and Liquidity Partner balances through volatile tapes, and kept exception logs that owners could action before downstream teams consumed stale data, mirroring the governance, cross-team coordination, and crisp institutional communication the posting describes.

Previously at Amber Group I maintained disciplined pivot-led BAU for market-making partners and produced Tableau scorecards tying incentives and throughput to about 15% measured revenue uplift, while documenting exceptions with clear owners for rapid follow-up. During my FICC internship at Huatai Financial Holding I rotated through Liquidity Management and the Flow Trading desk for Cash Bonds and partnered with Risk and Settlement on confirmations, limits, and funding checks before cut-offs.

My M.Sc. Finance with Honours at HKUST and B.B.A. Professional Accountancy with Honours at CUHK with a Finance minor, together with Bloomberg, Wind, Tableau, Excel/VBA, and R, prime me for data-heavy ECM documentation. I stay steady in high-stakes, deadline-driven markets and welcome a conversation about how disciplined trade-support and sell-side rotations can bolster your ECM team while I learn origination pacing from senior partners.

Thank you for considering my application.

Sincerely,

Zhao Yanbo
