- Standardized settlement protocols and parallel workflows for high-velocity international trading while protecting execution quality indicators and exception hygiene that map to regulatory expectations on the trading floor.
- Managed multi-asset settlement for ETFs, RWAs, and FX-linked flows with disciplined logs so failure rates stayed <0.5% when reconciling liquidity-provider routes for brokers and treasury.
- Ran real-time treasury surveillance on house and custodian balances through volatile sessions, translating liquidity and latency cues into short briefings that keep Front Office workflows informed without slowing execution.

- Delivered Tableau dashboards tying event ROI and BD incentives to throughput, aligning desk narratives with measurable outcomes tied to roughly 15% revenue growth in Web3 operations the leadership team reviewed.
- Sustained disciplined spreadsheet refreshes and BAU maintenance during fast crypto tapes so leadership consumed consistent liquidity-partner status when balances shifted hourly.
