Work Experience

OSL

Trading & Liquidity Department, Trade Support Associate

Hong Kong

Dec. 2025 – Present

- Built scalable operational frameworks across HK, SG, AU, CA, ID, and BM with standardized settlement protocols so high-velocity trading stayed aligned with booking and regulatory expectations across venues.
- Owned end-to-end settlement for ETFs, RWAs, and FX-linked treasury flows; tuned fiat ramps and LP routes with disciplined exception logs, keeping venue failure rates under 0.5% while liquidity stayed usable for desk execution.
- Ran cross-chain liquidity rebalances and bridge operations for just-in-time desk inventory; reduced hedging slippage and gas drag versus manual paths and improved capital turnover by about 20% in the measured window.
- Monitored house and custodian balances through volatile sessions; escalated booking breaks and liquidity gaps with concise rationales so Front Office could stay on risk while controls stayed independent, matching high-touch sales trading tempo.

- Coordinated MM and BD sourcing, screening, and execution with Risk and finance partners so incentives, lifecycle milestones, and settlement hand-offs synchronized ahead of month-end reporting, mirroring institutional client coverage rhythms.
- Shipped Tableau dashboards on event ROI and BD incentives that tied throughput to revenue and supported about 15% revenue growth in Web3 operations in the leadership-tracked campaign window.
- Logged recurring STP and exception themes for leadership, flagging operational risk early and pairing each issue with an accountable owner so follow-up matched sell-side control discipline under time pressure.
