Tether Hiring Team
Tokenization Expansion
Remote (Hong Kong SAR)

Re: Expansion Manager, Tokenization (Hadron-institutional onboarding focus)

Dear Hiring Manager,

I am writing for the Expansion Manager opening on LinkedIn (4404580379) supporting Hadron-era client and partner programs for Tether. The brief matches how I coordinate institutional flows today: marrying capital-markets literacy with disciplined project controls across trading, treasury, settlements, and external partners while keeping reporting accurate under tight timelines.

Currently at OSL in Trading & Liquidity, I design multi-jurisdiction operating frameworks covering ETFs and real-world-linked asset settlement, tune fiat ramps and liquidity-provider choreography, execute bridge-led liquidity reallocations tied to treasury goals, and run custodian surveillance with crisp escalations whenever positions drift from policy. Earlier at Amber Group I rebuilt market-making BAU dashboards, anchored MM plus BD rollout work, modeled incentive economics in Tableau, and logged Straight Through Processing issues with owners analogous to milestones you track across business, product, and technology collaborators.

Summer work at Huatai Financial Holding and China Life Insurance trained me in FICC rotation rigor, allocator-grade fixed income surveillance, and Bloomberg-led idea memos, while Guotai Junan and Evalueserve sharpened contract diligence, confirmation discipline, and Tableau storytelling for leadership decisions. I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours) from CUHK, with Bloomberg, Wind, Tableau, Excel/VBA, and R ready for research memos, commercial drafts, and workflow improvements you highlighted.

I stay calm in high-stakes digital-asset environments, communicate clearly with internal and external stakeholders, and can travel internationally when regulators or partners require in-person alignment. Thank you for considering my application; I would welcome discussing how I can advance Tokenization Expansion initiatives at Tether.

Sincerely,

Zhao Yanbo
