Education

City University of Hong Kong

Bachelor of Science in Computer Science, Minor in Business Intelligence

Hong Kong

Jun 2022 – Jun 2026

- **Scholarships & Awards:** International Student Top Scholarship (HK\$720,000 total); Dean's List; Tiger Talent Program (3×).
- **Coursework:** Web Application Development, Machine Learning, Databases, Data Structures, Software Engineering, Networks, OS, Computer Vision.

Work Experience

Hong Kong Monetary Authority

Analyst Programmer (IT Division - Business Enablement & Software Architecture Team)

Hong Kong

Jul 2025 – Present

- Engineered an open source chatbot for BRDR utilizing RAG on a knowledge base of about 10,000 PDFs, using Python for data processing, pgvector for vector storage, SQL-backed vector search for retrieval, and Grafana for observability on daily operations workloads.
- Developed an agentic firewall review automation tool using LLMops practices, saving about 30 hours/month for security reviews, with JIRA API, Next.js, and OPA policy-as-code to encode guidelines into LLM-friendly workflows.
- Spearheaded an AI Outlook Email Assistant as part of a scrum team through the full SDLC with L3 production support; worked with the Product Owner on requirements, training, prompts, documentation, and Tableau and Power BI dashboards for reporting packs.

Jay Cee Ess Global

Software Engineer

Remote (Australia-based)

Aug 2025 – Present

- Performance tracking tied to about AUD 100,000/month revenue context; revamped legacy site into a high-performance web app with Google Ads and UX work for about 200% user intake and higher conversion.
- Reduced cart abandonment about 70% by integrating Stripe with Apple Pay, Google Pay, and Alipay for multi-method checkout and post-rollout monitoring.
- Cut price retrieval latency about 99% with a custom in-memory routing engine based on Yen's K -shortest paths algorithm and repeatable integration tests before rollout.
- Reduced database costs about 75% by replacing a rigid Supabase setup with Vercel Upstash Redis for fast lookups and complex multi-carrier routing, unlocking new logistics market segments.

Universal Innotech Group Company Limited

Junior Software Engineer

Hong Kong

Sep 2024 – May 2025

- Built AML checking and PEP automation in JavaScript, React, and Python; reduced Open Sanction API spend by HK\$ 10,000+/month with Neo4j graph APIs and Python scraping for sanctions and PEP updates on B2B KYC SaaS workflows.
- Ran Python ETL pipelines for recurring reports across 50,000+ records per cycle; cut report prep about 40% and turnaround from about two days to about two hours with validation checks before each rollout.
- Refactored a B2B SaaS platform with RESTful APIs and Neo4j integration for relationship visualisation; about 30% faster client decisions after iterative enhancement and regression testing.

Yi Shing Group Ltd. (YSG)

Summer Intern

Hong Kong

Jun 2024 – Aug 2024

- YOLOv8 fire and smoke in real time (about 90% to 95% accuracy after optimisation toward Vertex AI) with a full-stack Flask app and CI/CD; webcam inference on ModelArts/OBS; electrical engineering collaboration on field tests and load and performance endpoints for hazard drills.

Projects

Blockchain Web3 E-Wallet (JavaScript, TypeScript, Next.js)

Feb 2025 – Mar. 2025

- Web3 app for wallet creation, wallet connect, and secure transfers using JavaScript and TypeScript client flows; added regression checks before stakeholder demos and documented known edge cases for maintenance handoffs.

Movie Search and Recommender (Python, JavaScript, jQuery, Flask)

Jun 2024 – Jul 2024

- Flask and Pandas preprocessing pipelines; REST APIs with genre, cast, and year filters and pagination; jQuery-driven filters with server-side validation and error handling for stable rollout to reviewers.

Skills and Interests

- **Programming Languages:** Python, Go, Rust, SQL, JavaScript, TypeScript, Java, C, C++, Bash, PowerShell, HTML, CSS, UNIX
- **Libraries & Frameworks:** Node.js, Express, React, Redis, Next.js, Vue.js, FastAPI, Pydantic, Flask, jQuery, Tailwind CSS, Selenium, NumPy, Pandas, SciPy, scikit-learn, Spark, Seaborn, Matplotlib, PyTorch, OpenCV, TensorFlow, ONNX Runtime, Hugging Face
- **Software and Tools:** Git, GitHub, Jira, Confluence, Postman, PostgreSQL, MySQL, MongoDB, ServiceNow, Vercel, AWS (S3, Lambda, Redshift, QuickSight), GCP, Azure, Docker, Kubernetes, Grafana, Ansible, Linux, Microsoft 365, MCP servers
- **Skills:** Application development, Node.js server work, full SDLC, coding, testing, rollout, maintenance, enhancement of existing systems, research into new technologies, REST APIs, UI/UX, Neo4j, RAG, LLMs, MLOps, LLMops, GenAI, Tableau, Power BI, CI/CD, Agile/Scrum, L3 support, technical writing, SEO (WordPress), system design, software architecture, debugging, ownership
- **Languages:** English (fluent); Cantonese and Mandarin (working proficiency); Urdu; Hindi
- **Interests:** Swimming, running, chess, Formula 1
