Hiring Team
Innocorn AI
Hong Kong SAR

Dear Hiring Manager,

I am applying for **Digital Marketing (Internship)** with Innocorn AI in Hong Kong SAR. I've shipped web and reporting work where messy inputs need a clean story, and I'm used to HKMA delivery where dates stick and tone matters.

You want help on campaigns, market research, social and site content, and events. I can research fast, write clear notes, build visuals leaders trust, and support launches without dropping tasks.

- **HKMA reporting cadence:** I own Tableau and Power BI dashboards with product owner metric definitions, training, and SOP level documentation so weekly leadership packs became refreshable KPI views instead of static exports.
- **Jay Cee Ess growth web work:** I revamped a legacy funnel and site with Google Ads and UX experiments tied to about AUD 100,000 monthly revenue context, lifted user intake about 200%, and cut cart abandonment about 70% after Stripe and wallet checkouts.
- **CityU research and WordPress site:** I ran exploratory analysis on 20+ ESG reports for trends and risks, and I built hkmrs.org with WordPress and CSS with SEO and UI focus for a professional society site.

I've worked in high risk delivery at HKMA and I'm happy in the weeds when the work still ships on time. Happy to talk on what your team needs first.

Warm Regards,

Syed Ayan Ali
