Sentient Labs Hiring Team
Hong Kong SAR

Re: Strategic Finance and Operations

Dear Hiring Manager,

I am writing to apply for the Strategic Finance and Operations role at Sentient Labs in Hong Kong (LinkedIn posting 4413733037). The posting blends strategic finance, FP&A discipline, treasury-style cash and on-chain flows, and cross-functional execution with Product and business partners, which matches how I have worked across trading operations, liquidity, and investment settings.

At OSL in Trading & Liquidity, I build scalable operational frameworks across multiple jurisdictions, run settlement and liquidity workflows with tight exception discipline, and monitor treasury and custodian positions through volatile markets so leadership receives clear signals on liquidity and booking health while initiatives scale.

Previously at Amber Group, I ran market-making operations analytics with pivot-led controls and Tableau dashboards that tied incentives and throughput to revenue outcomes, and I coordinated MM and BD execution with disciplined hand-offs to reporting. At Huatai Financial Holding I rotated through liquidity and cash bond desks and used Excel-VBA with Risk and Settlement to keep limits and settlement paths aligned with finance consumers. At China Life Insurance (Overseas) I supported a large fixed income book with Bloomberg and Morningstar research packaged for portfolio decision makers.

I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours) with a finance minor from CUHK, with Bloomberg, Wind, Tableau, Excel/VBA, and R. I communicate clearly, work iteratively with lean teams, and focus on measurable outcomes across finance and operations.

Thank you for considering my application. I would welcome a discussion on how I can support Sentient Labs on forecasting, partnership economics, and resilient operating cadence across entities.

Sincerely,

Zhao Yanbo
