Deckers Brands Treasury Leadership
Hong Kong SAR

Re: Treasury Manager, APAC

Dear Hiring Manager,

I am writing to apply for the **Treasury Manager, APAC** opportunity with Deckers Brands in Hong Kong SAR (posted via BoF Careers, LinkedIn 4218001615). The role's mandate for regional liquidity insight, multicurrency settlements, FX exposures, disciplined cash controls, mainland China banking rhythm, and predictable reporting matches my trade support and treasury-adjacent operations experience.

On OSL Trading & Liquidity as Trade Support Associate, I build settlement frameworks across HK, Singapore, Australia, Canada, Indonesia, and Bermuda, steward ETF, RWA, and FX-linked treasury-style cash paths, execute cross-chain liquidity moves that improved capital turnover by about 20%, and monitor custodian balances through volatile markets while logging exceptions finance partners can trace.

At Amber Group Market Making Operations I ran pivot-led BAU that improved tracking efficiency by about 30% and shortened liquidity-partner delays by about 25%, and I produced Tableau dashboards on incentives and event ROI that aligned with about 15% revenue growth signals in Web3 operations.

My FICC rotations at Huatai Financial Holding paired Liquidity Management with the Cash Bonds desk and Excel-VBA tooling alongside Risk and Settlement, while my China Life fixed income internship covered about \$5 billion across thirteen funds with Bloomberg-heavy analysis. I earned an M.Sc. Finance (Honours) at HKUST and a B.B.A. Professional Accountancy (Honours) at CUHK and communicate in native Mandarin with proficient English for cross-border treasury partners.

I welcome the chance to support APAC forecasting, settlement accuracy, hedge documentation discipline, and partnering with auditors and finance controllers at Deckers Brands.

Thank you for considering my application.

Sincerely,

Zhao Yanbo
