Equity Capital Markets
Hong Kong SAR

Re: Associate to Vice President, Equity Capital Markets (Hong Kong SAR)

Dear Hiring Manager,

I write to pursue the Equity Capital Markets opening your Hong Kong SAR team posted on LinkedIn (posting 4413888723), where Chinese-language copy outlines Associate-through-Vice President expectations for ECM execution on IPOs, follow-ons, rights issues, block trades; Greater China corporate and institutional touchpoints; exacting pitch and valuation material review; regulatory engagement; plus syndicated pricing and allocation choreography.

At OSL in Trading & Liquidity I extended settlement frameworks across several jurisdictions with recorded controls Finance could trust before month end, tightened ETF, RWAs, FX, fiat, and bridge workflows that kept measurable failure rates beneath 0.5%, and pushed overnight escalation notes whenever treasury or Liquidity Partner positions thinned ahead of volatile opens.

Previously at Amber Group I maintained pivot-heavy market-making BAU, published Tableau scorecards aligning incentives with throughput contributing to roughly 15% Web3 revenue lift in finance-tracked windows, and surfaced straight-through-processing misses with accountable owners weekly; China Life insurer diligence plus Guotai Junan confirmation cycles trained me on documentation precision similar to ECM file hygiene expectations. Huatai's FICC rotation exposed me to Liquidity Management, cash bond confirmations, Global IG research packaging, Risk and Settlement checkpoints, plus Excel-VBA FTP trackers before Asia cut-offs.

My HKUST MSc Finance with Honours, CUHK B.B.A. Professional Accountancy with Honours and Finance minor, native Mandarin paired with proficient English usage, Bloomberg, Wind, Tableau, Excel/VBA, and R fluency underpin that operations-to-markets toolkit. Having thrived in high stakes, delivery focused venues alongside multinational liquidity and risk partners, I am eager to discuss how pragmatic trade-support instincts can bolster your ECM execution rhythm.

Thank you for considering my application.

Sincerely,

Zhao Yanbo
