Work Experience

OSL

Trading & Liquidity Department — Trade Support Associate

Hong Kong

Dec. 2025 – Present

- Acted as the daily escalation bridge between liquidity trading, treasury, and jurisdictional partners (HK, SG, AU, CA, ID, BM), translating booking and settlement status into crisp updates so Front Office and Operations stay aligned ahead of reactive cut-offs.
- Owned multi-asset settlement for ETFs, RWAs, and FX-linked flows while logging exceptions tightly so failure rates stayed <0.5% when reconciling liquidity routes for brokers and internal consumers.
- Executed cross-chain liquidity moves and strategic bridge workflows to keep JIT inventory available for traders, improving capital turnover by 20% while controlling hedging slippage and gas overhead cited in desk reviews.
- Ran treasury surveillance on house and custodian balances across stressed tapes and compressed latency signals into actionable reads that supported trader decisions without delaying high-touch workflows.

- Supported MM and BD sourcing, screening, and execution milestones with counterparties so incentives, trade narratives, and hand-offs stayed traceable for client-facing stakeholders.
- Built Tableau views that tied event ROI and BD incentives to throughput, aligning desk storytelling with leadership metrics tied to about 15% revenue growth on the Web3 initiative slate.
- Delivered disciplined daily refreshes and narrative commentary around liquidity-partner activity so leadership consumed consistent risk-aware status during volatile sessions.
