Nomura Hiring Team
Global Markets
Central, Hong Kong SAR

Re: Associate, Korea High Touch Sales Trading, Hong Kong

Dear Hiring Manager,

I am writing to apply for the **Associate, Korea High Touch Sales Trading** role with Nomura in Central, Hong Kong (LinkedIn posting 4409263906). The role's focus on supporting active trading from Hong Kong, partnering across sales, research, and operations, and sustaining disciplined execution and risk awareness matches how I work across trade support and markets-facing rotations.

At OSL in Trading & Liquidity, I support international trading with standardized settlement protocols, multi-asset booking hand-offs, and real-time treasury surveillance through volatile sessions. I keep exception logs tight, escalate breaks with clear rationales, and coordinate with Front Office and operations partners so liquidity and settlement pathways stay predictable for downstream controls.

Previously at Amber Group on the Market Making desk, I maintained disciplined BAU with pivot-led trackers and Tableau dashboards that tied incentives and throughput to desk outcomes, improving tracking efficiency by about 30% and cutting partner project delays by about 25%, with leadership-tracked revenue context near 15% growth in the measured Web3 campaign window. During my FICC internship at Huatai Financial Holding I rotated through Liquidity Management and the Cash Bonds flow desk, distributed Global IG research and macro inputs, and coordinated with Risk and Settlement on limits and settlement readiness alongside Excel-VBA monitoring.

I hold an M.Sc. Finance (Honours) from HKUST and a B.B.A. Professional Accountancy (Honours, Finance minor) from CUHK. I am native in Mandarin, proficient in English, and comfortable with Bloomberg, Wind, Tableau, Excel/VBA, and R in high-pressure, deadline-driven environments.

Thank you for considering my application. I would welcome the chance to discuss how I can support Instinet-aligned high-touch workflows and cross-functional execution quality in Hong Kong.

Sincerely,

Zhao Yanbo
